# **DETAILED ACTION**

The amendment filed April 22, 2008 has been entered.

Claims 11, 15, 17-23, 27 and 28 are currently amended.

Claims 1-10, 16, 24, 25, 29 and 30 are withdrawn.

Claims 12-14 and 26 are cancelled.

Claims 31 and 32 are newly submitted.

Claims 1-11, 15-25, 27-32 are pending.

Claims 11, 15, 17-23, 27, 28, 31 and 32 are examined on the merits.

# Election/Restrictions

1. This application contains claims 1-10, 16, 24, 25, 29 and 30 are drawn to an invention nonelected with traverse in the reply filed on November 5, 2007. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

# Claim Rejections - 35 USC § 112.

1. The rejection of claims 18 and 19 under 35 U.S.C. 112, second paragraph, is withdrawn in view of the amendment of the claims.

# Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it

10/552,013 Art Unit: 1638

pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

- 3. Claims 11, 15, 17-23, 27, 28, 31 and 32 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention, for the reasons set forth in the last office action.
- 4. Applicants' arguments filed April 22, 2008 have been fully considered but they are not persuasive. Applicants argue that the amendment of the claims should overcome the rejection, stating that the structure of 80% identity to SEQ ID NO: 16 or 17 and the functional activity of LPAAT is sufficient to satisfy the written description requirement. Applicants further state that the specification provides a second LPAAT coding sequence from *M. alpina* that is 100% identical to SEQ ID NO: 16 in the overlapping region, and LPAAT coding sequences from other species are also disclosed. Applicants argue that the two sequences from *M. alpine* constitute a representative number of species within the claimed genus. Also, applicant requests separate consideration of new claims 31 and 32 drawn to sequences that are 95% identical to SEQ ID NO: 16 or encodes a polypeptide 95% identical to SEQ ID NO: 17.
- 5. The Examiner maintains that applicants have not shown that the sequences set forth in the specification support that genus of 80% identity to SEQ ID NO: 16 or 17. Applicants have stated in their arguments that there is 100% identity in an overlapping region, but they do not point to said region or provide the sequence identity of the entire sequence. The Examiner maintains that the specification does not describe sequences that support the genus that is claimed, including that of 95% identity to SEQ ID NO: 16 or to sequences encoding polypeptides that are 95%

10/552,013

Art Unit: 1638

identical to SEQ ID NO: 17. The specification does not point to particular structural features that confer the claimed functional activity.

- 6. Claims 11, 15, 17-23, 27, 28, 31 and 32 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention for the reasons set forth in the last office action.
- 7. Applicants' arguments filed April 22, 2008 have been fully considered but they are not persuasive. Applicants argue that Example 16 at pages 96-98 of the specification discloses a *Mortierella* LPAAT transformed into yeast and that the coding sequence used in the example corresponds to SEQ ID NO: 16. Applicants further state that one could align various LPAAT sequences to identify conserved residues and motifs that are required for activity, and the specification teaches how to determine enzymatic activity, transform plants and analyze transgenic plants, wherein this would be considered routine screening.
- 8. The Examiner maintains that the specification does not disclose that SEQ ID NO: 16 is the sequence that is used to transform yeast in Example 16. Applicants have not pointed to where in the specification SEQ ID NO: 16 is identified by the name MaLPAAT, and the Examiner cannot find this association in the specification. In addition, the specification does not disclose the conserved residues and motifs that are required to identify an LPAAT sequence, and therefore, one skilled in the art would not be able to determine which portions of the sequence may be modified while still retaining LPAAT activity. Furthermore, the specification does not

Art Unit: 1638

disclose any LPAAT coding sequences transformed into a plant and analysis of said plants. The Examiner maintains that it would require undue experimentation by one skilled in the art to practice the claimed invention, as set forth in the last office action.

# Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

No claims are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elizabeth F. McElwain whose telephone number is (571) 272-0802. The examiner can normally be reached on increased flex time.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Anne Marie Grunberg can be reached on (571) 272-0975. The fax phone number for

the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would

like assistance from a USPTO Customer Service Representative or access to the automated

information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
